THE DYE

Manufactured specifically for the staining of banknotes or documents in the event of robbery or theft.

An inert indelible liquid which cannot be washed off or bleached out.

Safe to handle.

Eco Friendly.

Non carcinogenic.

Tested by the South African Bureau of Standards and is accepted for use by the South African Reserve Bank.

SAMPLE OF STAINED MONEY

THE STAINING SYSTEM

The dye discharge system for ATM cassettes and some cash transportation boxes is already in use and can be modified or adapted to meet specific requirements.

**ATM CASSETTES WITH
DYE TUBES INSTALLED**

**ATM CASSETTE
AFTER ACTIVATION**

**OPTIVA ATM CASSETTE
AFTER ACTIVATION**

**NCR ATM CASSETTE
AFTER ACTIVATION**

UNIQUE IDENTIFICATION FEATURE

Deter-A-Dye has sourced and secured an additive which will provide the dye with a unique 'fingerprint' thereby allowing easy identification following the recovery of bank notes after a robbery.

Successfully tested on stained banknotes using various detection/sensing devices from handheld devices to highspeed counters as well as bill validators

**TYPICAL HIGH SPEED COUNTER
WITH FINGERPRINT DETECTORS**
